

A Top Standard Of Clean For Educational Facilities

The responsibility for caring for and educating young minds is one of the most demanding professions. Marcelo's Maintenance understands this and what it takes to keep students safe at school. While we can't help out with what they learn, we can surely help out with the cleanliness of their learning environment.

Marcelo's Disinfect Thoroughly - Our strength disinfectants provide a broad kill spectrum, with minimum volume usage, creating a healthier learning environment.

Marcelo's Know Restrooms - We understand that a clean classroom begins with a clean restroom, so we disinfect all counters, stall walls, fixtures, fittings, and push plates with our micro-fiber cloths and our hospital grade disinfectants. Bacteria cannot spread under this kind of cleaning schedule.

Marcelo's Know Carpets - Our multiple cleaning processes keep carpets fresh, clean and germ free.

Marcelo's Know Hard Floors - Again, the right kind of floor maintenance program can make all the difference in creating safer and better learning environments.

Marcelo's Work Greener - The less the better. Fewer chemicals means a healthier environment for staff and students alike.

Marcelo's Improve Air Quality - Our vacuums remove dirt and keep it out of the air quietly and more efficiently.
